SUMMARY

Software Engineer with 1+ year of professional experience building scalable, full-stack web applications using React.js, Node.js, Express.js, and MongoDB, with additional experience in PostgreSQL and MySQL. Strong background in developing end-to-end features, integrating REST/GraphQL APIs, and collaborating with cross-functional teams. Hands-on exposure to AWS S3. Passionate about writing clean, maintainable code and delivering high-quality software solutions.

EDUCATION

BS Software Engineering – FAST NUCES September 2020 – June 2024
• CGPA: 3.15

EXPERIENCE

DEVSINC – Software Engineer Jan 2025 – Present

PlayerHub (Sports SaaS Platform)

- Built and maintained scalable frontend components for a multi-role platform (players, coaches, recruiters).
- Used React Query for efficient server-state management, caching, background refetching, and API synchronization.
- Designed intuitive dashboards that transformed complex datasets (scores, achievements, media) into clear UI experiences.
- Integrated Twilio SMS for real-time profile sharing and invitation flows.
- Focused on performance, responsiveness, and usability across desktop and mobile.

Linked (Job Portal Platform)

- Implemented complex, data-heavy dashboards using Redux for predictable global state management.
- Translated high-fidelity Figma designs into pixel-perfect, responsive UI components.
- Built analytics views with charts and filters while ensuring layout stability and performance.
- Optimized UI behavior for varying screen sizes and dynamic content updates.

Turing (Generalized Agents AI/LLM)

- Contributed to AI-driven systems involving scenario generation, assertions, and automated evaluation.
- Helped structure data and logic for AI outputs, gaining hands-on exposure to LLM workflows and AI system behavior.
- Collaborated with AI-focused teams to validate outputs and improve usability of generated results.

Manteio (Fintech Platform)

- Worked on real-time data streaming using WebSockets to display live trading and financial data in the frontend.
- Integrated APIs and streaming data sources to ensure low-latency updates and accurate UI state.
- Implemented UI improvements for analytics and transaction monitoring dashboards.
- Collaborated with backend engineers to handle performance and data consistency challenges

MULTI-TECHNO INTEGRATED SOLUTIONS – Next.js Developer Oct 2024 – Dec 2024

AXON ERP

- Designed and implemented responsive UI components for ERP modules including Sales and Inventory.
- Worked on reusable components and layout patterns to ensure consistency across large-scale applications.
- Collaborated with cross-functional teams to align UI behavior with business workflows.
- Worked within structured Git workflows and collaborative Agile processes.

BIG DATA ANALYTICS – *Software Engineer Intern*

July 2024 – September 2024

- Maintained and optimized 20+ web scrapers using Python, Selenium, and Scrapy.
- Automated data pipelines and improved data accuracy by ~60% through validation and cleaning.
- Uploaded and managed large datasets using AWS S3 buckets, ensuring secure and reliable data storage.

FASTDEV LABS – *Web Developer Intern*

July 2023 – September 2023

- Built React.js components integrated with Node.js, Express, and MongoDB.
- Assisted in API design and frontend-backend integration.
- Focused on clean component architecture and reusable UI patterns.

PROJECTS

Manzil NOW (FYP) – *Flutter, React.js, Tailwind CSS, Node.js, Firebase*

- Developed a ride-hailing platform prioritizing safety for female passengers.
- Created role-based dashboards (Admin, Driver, Passenger) and integrated Firebase Auth, Firestore, and Storage.
- Implemented real-time status updates and administrative complaint management

Full Stack Blog App – *Next.js 13, NextAuth, Express.js, MongoDB*

- Implemented user authentication, SSR, CRUD, and role-based access with a responsive Tailwind CSS frontend.

Food Delivery App – *Next.js, Tailwind CSS, Shadcn, Firebase*

- Designed and developed a complete food ordering system with authentication, order tracking, cart management and admin dashboard.

Portfolio Website – *Next.js, Tailwind CSS, Framer Motion*

- Designed and built a responsive personal portfolio showcasing projects and skills.
- Focused on clean layouts, smooth animations, and consistent visual hierarchy.ns.

KEY SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React, Next.js, Tailwind CSS, Flowbite, Framer Motion, Material UI

Backend: Node.js, Express, REST APIs, FastAPI, GraphQL

State & Data Management: React Query, Redux, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, Firebase

AI & Tooling: LLM evaluation, prompt design, AI-assisted coding tools

Cloud & DevOps: AWS S3 (file uploads), Vercel

Tools & Practices: Git (GitHub/GitLab), Agile/Scrum, Jira

CERTIFICATIONS

Data Manipulation in SQL – *DataCamp*

September 2023

React – *Sololearn*

July 2023

JavaScript – *Sololearn*

July 2022

HTML5 & CSS3 – *Purple*

July 2022
